PROJECT EXPERIENCE

Centennial InterPort™ Lot 15

Centennial Airport, Colorado

Highlights

Master Planning & Engineering Services

Project Cost

\$2.7 Million

Client

The SunBorne Companies

Project Description

J & L Management Services solicited experienced firms for their proposed Office and Hangar project located within the Interport Development at Centennial Airport. J & L chose WECEI based on their extensive experience at Centennial Airport and Interport Development in particular. WECEI prepared designs necessary to meet required parking, horizontal and vertical access criteria, drainage, grading, utility, fire access, fire flow, erosion control GESC, easements, and landscape criteria. WECEI also prepared site designs necessary to meet all additional aviation criteria (FAA) for taxi lanes, taxi lane object free areas, specific aircraft design group access and aprons, proximity to future ACPAA Taxiway Delta object free and safety areas, height exceptions, building restriction lines, and FAA permitting (7460, crane, etc). The approving entities included Arapahoe County Public Airport Authority (ACPAA), Federal Aviation Administration (FAA), Arapahoe County Engineering, Arapahoe County Water and Wastewater Authority (ACWAA), South East Metro Storm Water Authority (SEMSWA), South Metro Fire & Rescue, Cherry Creek Basin Water Quality Authority, and the Interport Development Design Review Committee.
