City Bark Doggie Day Care-Stonegate

Parker, Colorado

Highlights

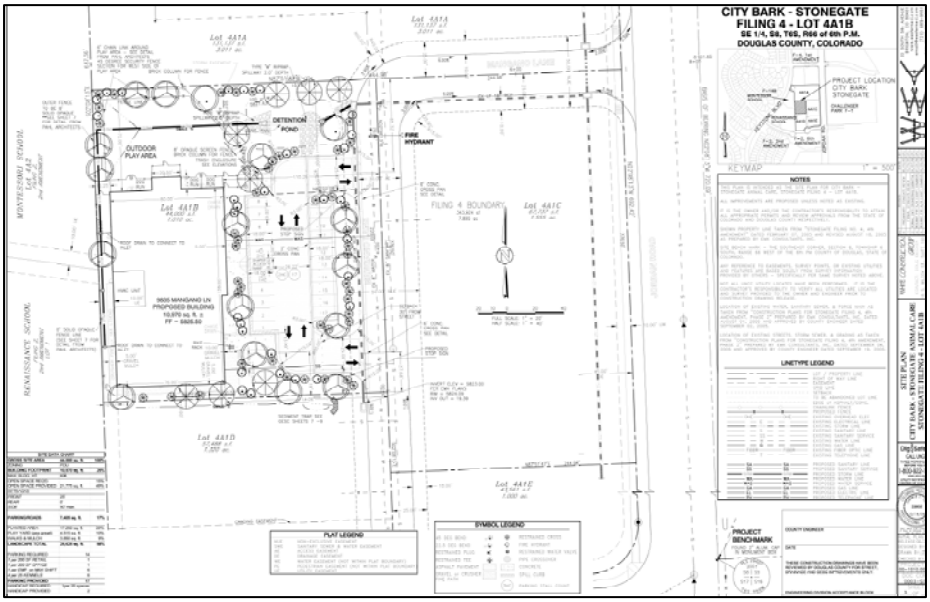
Land, engineering and landscape architecture services

Project Cost

$17,500 Consulting

Client

White Construction Company



Project Description

Western Engineering Consultants, Inc. (WECI) was hired by White Construction Company to perform engineering, land planning and landscape architectural services for this project. As a result of our performance on the Brighton Animal Clinic, Play!Stay! & More!, WECI was recommended by the owner to White Construction.

Citybark has a 10,900 square foot facility on site with capacity to house 100 animals in their indoor kennels. Other amenities planned for this doggie day care include multiple secure dog runs, and a 3000 square foot fenced outdoor play area.

Other site features include on site detention basin for drainage of surface water, ample parking for drop offs and office visits, a bike rack for kids and an extensive landscape package to buffer this development from Mangano Lane.
