Salud Administrative Office Building

Fort Lupton, Colorado

Highlights

Planning and engineering

2 story office building with
Maintenance building

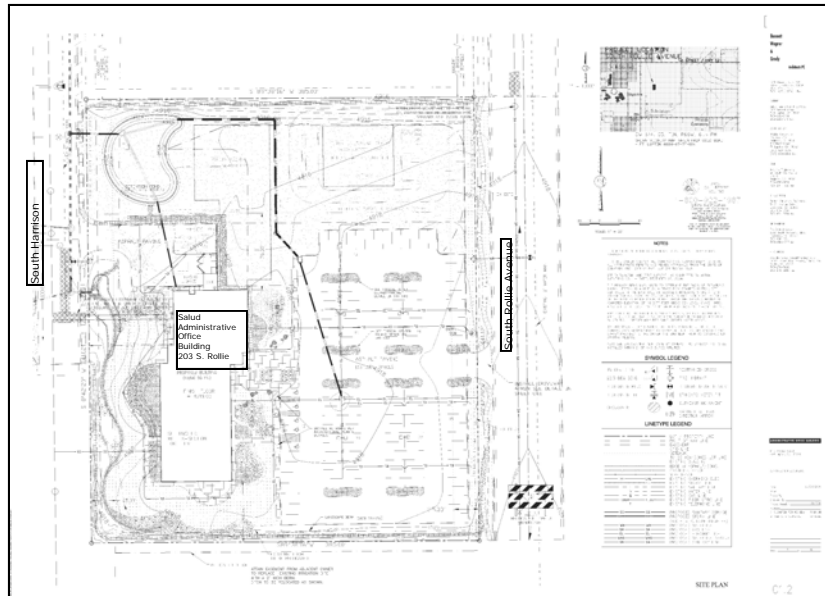

Landscaped event open
space

Project Cost

\$1 million construction
\$25,000 engineering

Client

Salud Family Health Centers

Project Description

The Salud Administrative Office Building is a signature building in the city of Ft. Lupton. Many local citizens will use this building on a daily basis. This two story health/medical building has a 15,000 sq ft footprint. The project included a 2,000 sq ft maintenance building, 125 space parking lot, loading dock and landscaped event open space area.

Western Engineering Consultants (WECI) was hired for its commercial land development expertise. WECI took this property through the Ft. Lupton preliminary and final platting and engineering applications for the project. WECI provided various layout options for the loading dock as well as the 2 parking areas during the planning stages.

Designs for this project included the extension of Rollie Street collector on the east side of the project as well as complete drainage facilities for the 4.1 acre site.
