Client

MBA Architects, Inc.,
Wisconsin

Project Description

Western Engineering Consultants (WECI) was retained by MBA Architects out of Wisconsin to design and obtain approvals for an existing Staples distribution center. Staples requested additional employee parking for the warehouse. The parking lot expansion required WECI to redesign drainage, grading, utility locations and an extensive landscape buffer along the access road.

As the project progressed, Staples value engineered the parking lot from the project and a re-striping plan to reconfigure some of the loading dock and semi parking area was proposed instead. Additionally, they requested WECI to include utility stub outs on the second parcel for a building expansion.
